

FORT CHARLOTTE

Bahamas, BWI

*Solutions
with a
Focus on
Cultural
& Natural
Heritage*

The historical values embodied in Fort Charlotte and at the botanic garden are rich and diverse giving it the capacity to be the most significant historic and cultural attraction in The Bahamas. Its physical as well as historic relationship to Old Nassau offers a major addition to the mix of attractions complementing the visitor experience. The ensemble includes the fort with its military earthworks, adjacent botanic garden and the creation of a traditional Bahamian market.

Under the auspice of the Lady Darling Heritage Foundation, this project's mandate was to restore Fort Charlotte, develop the botanic gardens and create a Bahamian market as a heritage tourism attraction. Commonwealth Historic Resource Management Limited in association with ARA Group and Design + Communications Inc. was retained to prepare a feasibility study including research, planning and feasibility advice to determine the viability of the project.
